AA-5 SERIES  
ILLUSTRATED PARTS CATALOG

SECTION I

INTRODUCTION

1. GENERAL

This Illustrated Parts Catalog provides an illustrated breakdown of parts necessary for the support and maintenance of the 1977, 1978 and 1979 models AA-5A and AA-5B aircraft. The illustrated Parts Catalog is intended as an aid in the identification and requisition of replaceable units and assemblies. Units and assemblies are illustrated in normal assembly and disassembly relationships, and the parts are listed in disassembly order where such a relationship exists.

Breakdown of subassemblies is limited to those components and parts where optimum maintenance practices and other considerations dictate replacement of components and parts rather than replacement of the subassembly as a whole. Assemblies held together by bonding and weldments are not broken down except for seals, rub strips, nut plates and other readily replaceable components. The Illustrated Parts Catalog is intended as a companion document to the AA-5 Series Maintenance Manual and contains all parts information for which maintenance practices coverage has been provided.

The Illustrated Parts Catalog is organized into aircraft systems, a combination of related components which perform a specific function.

2. TABLE OF CONTENTS

The Table of Contents is located immediately following the List of Effective Pages in the front of this book. The Table of Contents lists the section and chapter titles contained in this catalog.

Each chapter of Section III contains its own Table of Contents.

3. SECTION I – INTRODUCTION

Section I contains information applicable to the Illustrated Parts Catalog as a whole. Specific information and explanations useful in locating, identifying, and obtaining parts are included.

4. SECTION II – NUMERICAL INDEX

The Numerical Index is a tabular alpha-numeric listing of all part numbers included in the Detailed Parts List, and the Chapter, Figure, and Index number where these part numbers appear. Except for standard fastener items, the part numbers are shown for each entry. Standard fastener items (attaching parts) such as nuts, bolts, washers, rivets, screws, and other items which may be used in many locations on the aircraft are listed with AR (As Required) with no reference to chapter, figure, or item number.

5. SECTION III – DETAIL PARTS LIST

The Detail Parts List consists of parts listings and related figures necessary for the support of the aircraft. The information is arranged into five major groups: Aircraft General, Airframe Systems, Structure, Propeller, and Power Plant. The five groups are further broken down into chapters and figures in accordance with Air Transport Association of America Specification No. 100 – Manufacturers Technical Data.

A. FIGURES

The figures are comprised of general or exploded views of the component or system under consideration. Numbered leader lines are used to point out parts or assemblies, and the numbers correspond to those found in the "Figure and Index No." column of the Detailed Parts List. To keep the quantity of index numbers on a given figure to a minimum, one or more of the following methods may be used:

- (1) A detail view may be included to portray components hidden from view or of sufficient complexity to require further breakdown. In such cases, a bold letter is included on the basic figure to locate the detail view, and a corresponding letter is used to identify the detail drawing.
- (2) One index number may be assigned to parts that are opposite (left-hand and right-hand) but not interchangeable. In these cases, the opposite part or assembly is listed immediately beneath the one assigned an index number. The parts are differentiated by (LH) or (RH) in the "Nomenclature" column.
- (3) A single index number may be assigned to a bolt or screw, and the accompanying nut and washers left unnumbered if the assembly is conventional. Explanatory notes such as (UNDER HEAD) or (UNDER NUT) may accompany washers in an (Attaching Parts) group.
- (4) Where commonality of components allows, left-hand and right-hand assemblies are listed together. Components peculiar to one assembly or the other are identified as (LH) or (RH) in the "Nomenclature" column. If a component does not have a corresponding part in the opposite assembly, the note (LH ONLY) is used.

AA-5 SERIES  
ILLUSTRATED PARTS CATALOG

- (5) Shims, spacers, gaskets, and like components which are readily located may be identified with a single index number.
- (6) Attaching parts may have no index number if they are easily identified and located.

**B. "FIGURE & INDEX NO." COLUMN**

This column contains the ATA chapter number, the figure number, and a listing of index numbers assigned to locate parts on the figure. The designation 28-12-16 in the column indicates Chapter 28, Figure 12, Index Number 16.

**C. "PART NUMBER" COLUMN**

The identifying standard or part number assigned to a component or assembly is contained in the "Part Number" column. If no part number has been assigned, the words "NO NUMBER" appear. The entire number must be used when ordering parts or making inquiries.

**D. "NOMENCLATURE" COLUMN**

The "Nomenclature" column contains the basic name of the part as shown on Grumman American drawings. The nomenclature may have been expanded for clarity and ease of identification, or abbreviated because of space considerations. Additional information (listed below) may be included as required to further identify a part.

(1) Cross References

NOTATION	MEANING
(SEE FIGURE XX-XX FOR DETAIL BREAKDOWN.)	The assembly is broken down into components on Figure XX-XX.
(SEE FIGURE XX-XX FOR NHA.)	Refer to Figure XX-XX for the correct assembly relationship of the part or assembly shown.
(LH) or (RH)	Used to identify similar but non-interchangeable parts or assemblies.
(LH SIDE ONLY) (RH SIDE ONLY)	Parts or assemblies not found on both sides.
(REORDER )	The part in the "Part Number" column is no longer available. The "REORDER" part is interchangeable with the original part.
NOTE:	Used to highlight information needed in obtaining the proper part.
ALTERNATE PART:	Used to indicate parts by other vendors which are directly interchangeable. These parts may be substituted on parts orders depending on stock availability.

(2) Vendor Parts

Components and assemblies supplied as off-the-shelf items by vendors can be identified by a five-digit numerical code prefixed by the letter "V" in the "Nomenclature" column. This Vendor Code is in accordance with the Federal Supply Code for Manufacturers Cataloging Handbook H4. If no vendor code is assigned in the H4 handbook, the Vendor's name is given. Paragraph 8 contains a listing of all Vendor Codes, names, and addresses used in this Illustrated Parts Catalog.

(3) Attaching Parts

Except for studs, nutplates, and other fastening devices permanently attached to parts or assemblies, attaching parts such as screws, bolts, nuts, washers, rivets, and other devices are listed immediately following the parts or assemblies which they secure. The symbol - - - - - \* - - - - - terminates the attaching parts listing. The following headings are used for attaching parts:

- (a) (ATTACHING PARTS) - Used to signify that the parts and quantities listed are those required to attach one unit (part or assembly).

AA-5 SERIES  
ILLUSTRATED PARTS CATALOG

- (b) (ATTACHING PARTS FOR quantity part number) is used to denote that the attaching parts listed are the total required to attach the quantity of parts noted.
- (c) (ATTACHING PARTS FOR INDEX NUMBERS THROUGH ) is used if the same types and quantities of attaching parts are used to attach each of the parts indicated.
- (d) (ATTACHING PARTS FOR INDEX NUMBERS AND ) is used if the attaching parts listed are those required as a common attachment for each pair of parts indicated by the index numbers. An example would be the common attaching parts used to secure an antenna and doubler to opposite sides of the aircraft skin.

(4) Indentation

The numbers 1 2 3 4 5 6 7 denote the indenture level of a part or assembly and are used to denote the correct assembly relationship of all parts, subassemblies, assemblies, and installations which comprise each figure.

**E. "UNITS PER ASSEMBLY" COLUMN**

- (1) The number given in the "Units Per Assembly" column is that quantity of units (parts or assemblies) used to make up one each of the next higher assembly. The only exception to this is attaching hardware items. See D. (3) (a) above.
- (2) The notation "REF" in the "Units Per Assembly" column is used to denote that the part or assembly shown has been counted elsewhere in the Illustrated Parts Catalog, and the listing shown is for reference purposes only. This method is employed to show attachment points, interfacing between systems, and if separate figures are used for detail breakdowns of subassemblies.
- (3) The notation "OBS" in the "Units Per Assembly" column indicates the part is not available and has been superseded or replaced with another part having a different part number. The "Reorder" part listed in the "Nomenclature" column is a direct replacement for the obsoleted part, and the new part will be shipped if the obsoleted part number is ordered.
- (4) The notation "AR" in the "Units Per Assembly" column is used for the following purposes:
  - (a) To denote bulk items such as sealant, lacing, safety wire, and paint.
  - (b) To denote that the quantity of shims, spacers, or other items used may vary to meet tolerances or other requirements.
  - (c) To denote that the part or assembly is optional equipment, and may or may not have been included on the aircraft.
- (5) The notation "NP" in the "Units Per Assembly" column indicates the part or assembly is non-procurable.

**F. "USABLE ON CODE" COLUMN**

The "Usable On Code" column contains a letter code denoting the range of aircraft production serial numbers on which a particular part may be used. When no letter code is given, the part is applicable to all aircraft covered by the Illustrated Parts Catalog. A list of usable on code letters and corresponding aircraft production serial numbers is included at the end of each parts list.

**6. AIRCRAFT IDENTIFICATION**

Each aircraft contains two plates which are useful in identifying and ordering the proper aircraft parts.

**A. AIRCRAFT IDENTIFICATION PLATE**

The aircraft identification plate contains the aircraft model number, production serial number and other required information. The plate is located on the aft fuselage, beneath the left horizontal stabilizer. The aircraft production serial number is needed to determine the proper part if serial number effectivities are used.

**B. FINISH AND TRIM PLATE**

The finish and trim plate indicates the model year, exterior color and trim, upholstery combination, and interior trim used on the aircraft. The information contained on this plate should be included with inquiries and orders for paint, trim, and upholstery items. The finish and trim plate is mounted on the upper left-hand firewall. Access is obtained by unlocking and raising the left-hand upper cowl.

**7. HOW TO USE THE ILLUSTRATED PARTS CATALOG**

The organization of the Illustrated Parts Catalog is intended to make support and maintenance of the aircraft easier. The material is organized so that the parts needed for repair or maintenance are located in the correspondingly numbered chapter of the Illustrated Parts Catalog as the Maintenance Manual.

Illustrations showing seals and placards have been included to ease the problem of identifying or locating these items. In addition to these illustrations, these parts are also carried with the system or assembly to which they apply.

AA-5 SERIES  
ILLUSTRATED PARTS CATALOG

A. If the part number is known:

- (1) Look up the part number in the part number index (Section II). Turn to the chapter and figure number in Section II to locate the part number.
- (2) Determine nomenclature, quantity, effectivity, and other information from the parts list.

B. If the part number is not known:

- (1) Determine the aircraft system or major assembly in which the part is used.
- (2) Look up the system or major assembly in the Table of Contents to determine the chapter number.
- (3) Turn to the chapter (Section III) and locate the part, using the figure and parts list.

**8. FEDERAL SUPPLY CODES**

The Federal Supply Codes used to identify suppliers of parts listed in the Detail Parts List are presented in numerical order below with the name and address of the suppliers.

<u>H4 Federal Supply Code No.</u>	<u>Vendor</u>	<u>H4 Federal Supply Code No.</u>	<u>Vendor</u>
	A.I.M. Corporation 9033 Monroe Road P. O. Box 12248 Houston, Texas 77017		Kismet Products Incorporated P. O. Box 306 Painesville, Ohio 44077

FINISH AND TRIM PLATE

The finish and trim plate is located on the upper left corner of the firewall.

The plate indicates the model year, exterior paint color, trim and registration number colors, accent stripe color, upholstery scheme and interior trim colors.

The following diagram is an example showing the sequence and definition of each code symbol on the finish and trim plate. The code chart lists the codes, paints, and upholstery combinations available from DuPont for the AA5A and AA5B Series aircraft (1977, 1978 and 1979 models).
